Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13, drawn to an electrode arrangement including a front cylinder with strip-shaped electrodes.

Group II, claim(s) 14-19, drawn to an electrode arrangement including a carrier which includes externally disposed metal bar profile members connected by insulating spacers and forming the electrodes.

Group III, claim(s) s 20-44 and 48-54, drawn to an electrode arrangement including electrodes formed of cylindrical tube portions having a hollow duct.

Group IV, claim(s) 45-47, drawn to an electrode arrangement including a rounded front cylinder forming a first electrode with a metal layer spaced from the cylinder as the second electrode.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: each individual group recites specific technical features not found in the other groups and which supports a patentably distinct concept.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
